FR-COMMERCE-L233-28-4-MAY2025 · reviewed 2026-11-12

WHAT MATTERS

Industry-only investigation: reporting teams may need reconciled consolidation-perimeter and sustainability data lineage. Group inclusion can exempt a consolidating group under V; no Lloyds effect established.

WHAT WE KNOW

> Exact French legal entity and formal applicability: Unknown. National code exists; amended EU thresholds, phase-in and consolidation exemption require separate review.

WHY A SALE MAY NOT FOLLOW

Group reporting can remove a separate obligation. No Lloyds French mandate or UK hypothesis is transferred here.

WHAT NEXT

Acquire an exact French register identity and accounts, then resolve current national thresholds, phase-in and consolidation exemption before asking any enterprise-specific commercial question.

Customer demand and territorial eligibility: Unverified. Buyer, budget and supplier opportunity remain unverified.

← Industry consequence

← Back to visual

France reuses the same industry structure; French market facts and enterprise footprint remain incomplete. Seller match is not demand. Location is not legal applicability. No Pipeline record is created.

Counter-tests

- Consolidated group reporting may remove a separate obligation — supported_possibility. Check controlling group inclusion and exemption conditions under V.
- Unproven entity or phase-in may mean no applicable reporting project — unverified. Obtain register identity, size and reporting period; do not infer from a group brand or country selection.
