Lloyds Bank plc · resilience assurance

PRA-SS1-21-MARCH2022 · reviewed 2026-11-12

WHAT MATTERS

Investigate whether critical-service dependency maps and recovery/exit exercises still demonstrate tolerances after technology or supplier changes. This is ongoing assurance, not evidence of a Lloyds deficiency.

WHAT WE KNOW

> Identity verified: LLOYDS BANK PLC / 00002065. Formal applicability: Unknown. Bank category supported; binding rule and regulator-register cross-check outstanding.

WHY A SALE MAY NOT FOLLOW

Existing teams or suppliers may already meet the need. The 2025 milestone is past; ongoing maintenance need does not prove an external contract.

WHAT NEXT

Which important service and legal entity, if any, has an evidenced dependency-testing gap that existing teams and suppliers cannot close? Ask the accountable resilience owner for current test outcomes before proposing work.

Customer demand and territorial eligibility: Unverified. Buyer, budget and supplier opportunity remain unverified.

Counter-tests

- Existing internal capability may already satisfy the need — unverified. Inspect current dependency maps, scenario tests and self-assessment; no deficient control is alleged.
- Ongoing maintenance may require no external contract — unverified. Check internal delivery and existing supplier coverage before suggesting procurement; the 2025 milestone has already passed.
