NVIDIA

Accelerated computing, networking and AI platforms

Pipeline →

Full-stack AI infrastructure connects chip design, systems, networking and software to a global partner ecosystem.

Financial context

Global group · FY2026 ended 25 January 2026 · USD

$215.938bn	$120.067bn	71.1%
Revenue	Net income · GAAP	Gross margin · GAAP

Data Center revenue **$193.7bn** · Global workforce **c. 42,000** at FY2026 year-end.

Reviewed trading update: **$96.221bn** revenue · Q2 FY2027 ended 26 July 2026 · Global group, USD.

Strategic priorities

Full-stack platforms

Vera Rubin systems, networking and software extend the AI infrastructure platform.

UK research ecosystem

A $250m, five-year compute-access donation supports UK agentic-safety research through UK cloud partners.

Partner-led reach

UK infrastructure collaboration includes CoreWeave, Microsoft and Nscale.

Commercial pressures

Manufacturing dependencies

Wafer production and memory supply depend on specialist manufacturers.

Customer concentration

Two direct customers represented 22% and 14% of FY2026 revenue.

Export controls

FY2027 Q3 guidance excludes Data Center compute revenue from China.

Customers, partners & suppliers

Customers & deployed use

Nebius

Deployment operator

UK · November 2025

Reported a UK Blackwell Ultra deployment.

University of Bristol

Research deployment user

UK · July 2025 launch reported

Isambard-AI uses NVIDIA Grace Hopper systems.

Partners

CoreWeave

UK infrastructure partner

UK · September 2025 announcement

Named in NVIDIA’s UK ecosystem announcement.

Microsoft

UK infrastructure partner

UK · September 2025 announcement

Named in NVIDIA’s UK ecosystem announcement.

Nscale

UK infrastructure partner

UK · September 2025 announcement

Named in NVIDIA’s UK ecosystem announcement.

Suppliers

TSMC

Wafer foundry

Global · FY2026 filing

Produces semiconductor wafers.

Samsung

Foundry & memory supplier

Global · FY2026 filing

Provides wafer manufacturing and memory.

SK hynix

Memory supplier

Global · FY2026 filing

Supplies memory.

Micron

Memory supplier

Global · FY2026 filing

Supplies memory.

UK programmes & activity

UK agentic-safety research compute

A five-year compute-access donation for the UK research community, including BOLD, SOFAIR and Imperial College London.

$250m

Five years · announced 13 Oct 2026

UK Blackwell Ultra deployment

Nebius’s London-area deployment combines compute, networking, cooling and on-site power.

Reported live · 6 Nov 2025

Where sales work may emerge

Hypothesis

UK AI deployment readiness

Infrastructure rollout may create integration, workload-onboarding and operational-readiness work.

Potential buyer: UK infrastructure operators and delivery partners

▶ Develop this opportunity

Hypothesis

Supply-chain planning & visibility

Specialist manufacturing dependencies may support scenario planning and supply-chain data integration.

Potential buyer: Operations and supply-chain teams

▶ Develop this opportunity

Hypothesis

Research platform enablement

A multi-year research compute programme may need onboarding, usage controls and safety-evaluation support.

Potential buyer: Programme delivery partners and research organisations

▶ Develop this opportunity
