ENTERPRISE TWIN / UK BANKING

Lloyds Banking Group.

How the business works. What is changing. Where the evidence leads.

How it works | Strategic timeline | Supplier & technology ecosystem | Opportunity landscape | Commercial Opportunities

Candidate research · as of 2026-11-10 · not accepted enterprise facts

Lloyds — three changes worth investigating

What changed: four primary documents re-opened and short located passages appended, preserving historical evidence. This deepens specificity, not verified customer demand.

AI value realisation and operating controls

Internal AI delivery and the disclosed Google Cloud collaboration are alternatives to an external services mandate.

Unanswered buying question: Which deployed workflow has a customer-

Legacy decommissioning and migration benefit assurance

Cloud adoption is not application retirement. Internal platform teams or existing partners may already cover the work.

Wallet and Curve integration outcome assurance

Wallet launch intent is not verified completion, Curve integration architecture, supplier demand or a procurement process.

Unanswered buying question: Which wallet integration outcome

owned net-benefit baseline, risk owner and a delivery gap that existing teams/Google Cloud cannot cover?

Inspect hypothesis, evidence & next step →

Unanswered buying question: Which named remaining application can be retired, who owns dependencies and what independently testable cost/control outcome will be accepted?

Inspect hypothesis, evidence & next step →

remains unmet, what is Curve versus Group scope, and who can authorise an external delivery tranche?

Inspect hypothesis, evidence & next step →

Evidence strength: short company primary excerpts; no independent outcome corroboration, current supplier contract, buyer authority or external buying intent established.

▼ Fresh primary provenance and acquisition limits

> building a new machine learning (ML) and Generative AI (GenAI) platform using Google Cloud's Vertex AI.

Candidate company statement · April 2025 announcement; current delivery and contract scope unverified. Publication: 2025-04-09; retrieved 2026-11-10T19:03:08.544040+00:00.

Inspect complete source, contradiction and relationship review →

Programme → operating capability → outcome to validate

> Research associations, not a complete application inventory or contractual topology. Group scope; no automatic brand/subsidiary propagation.

AI delivery

Group AI platform → data/model delivery → net benefit and control outcomes

Legacy simplification

Platform change → dependency retirement → cost and resilience outcome

Wallet proposition

Group wallet outlook → payments/customer experience → adoption and integration outcomes

Google Cloud Vertex AI is named in an April 2025 disclosure. Present contract breadth, exclusivity and programme ownership remain unknown.

Evidence, options & customer question →

Simplification is a stated direction. Named retirement waves, accountable application owners and verified benefits are missing. Retained 50% / 60% estate claims have different scope/period; never average them.

Evidence, options & customer question →

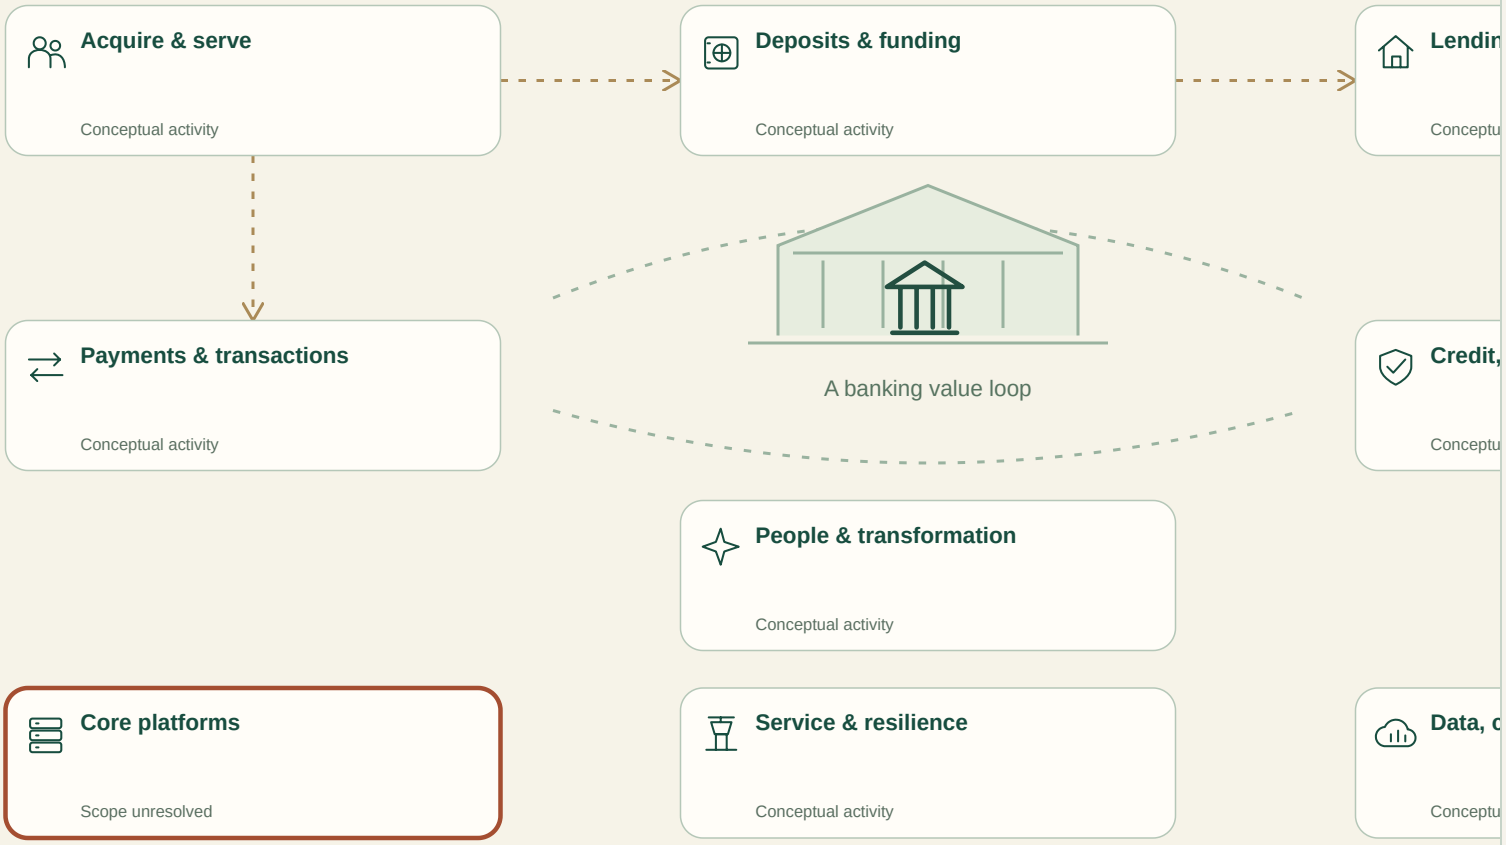

A product intention does not prove Curve integration design or completion. Current partner roles, operational readiness and an external service gap remain unknown.

Evidence, options & customer question →

01 / UNDERSTAND · UNITED KINGDOM

How Lloyds works.

Follow the banking value loop, then examine the systems, controls and transformation evidence beneath it.

Disclosed context — inspect source · Conceptual / interpretation · dashed arrows are modelled flows · Scenario / hypothesis · Unknown / missing · Challenged / conflicting scope

Illustrative banking activity model with Lloyds-specific evidence overlays; not a verified organisation chart, architecture or supplier inventory.

Acquire & serve | **Deposits & funding** | **Lending & credit** | **Payments & transactions**

Credit, fraud & controls | **Service & resilience** | **Core platforms** | **Data, cloud & AI**

People & transformation

Select an element to explore purpose, supporting research and what remains Unknown.

---

management expectation

Existing research records an expectation of additional AI value above GBP100m in 2026; this is not achieved value or procurement budget.

2026 management expectation

Inspect quotation and source provenance →

---

unverified historical research

Existing research reports Lloyds use of Google Cloud Vertex AI.

2025 announcement context

Inspect quotation and source provenance →

---

unverified historical research

Existing research reports 15 modelling systems migrated to Vertex AI.

2025 announcement context

Inspect quotation and source provenance →

---

unverified historical research

Existing research records 30,000 Copilot licences; current usage and net benefit are not established.

Existing Twin FY2025/2026 context; precise effective date unknown

Inspect quotation and source provenance →

---

unverified historical research

Existing research reports a Halifax-to-Lloyds brand/app migration announcement; current implementation and outcomes need verification.

2026 announcement context

Inspect quotation and source provenance →

---

unverified historical research

Existing research reports branch closures subject to access-to-cash rules and LINK reviews.

Local assessment periods unknown

Inspect quotation and source provenance →

---

unverified historical research

Existing research identifies third-party, AI, cyber and technology-failure risk disclosures.

Q1 2026 risk-factor context

Inspect quotation and source provenance →

---

interpretation

Digital activity is not proof of salary-flow capture, main-bank status or customer primacy.

Existing research assessment, July 2026

Inspect quotation and source provenance →

---

unknown

Existing research does not establish BPO workshare, contract values, renewals or exit constraints.

Existing research gap, July 2026

Inspect quotation and source provenance →

---

unknown

Existing research lacks sufficiently granular Lloyds-specific fraud and control-friction evidence.

Existing research gap, July 2026

Inspect quotation and source provenance →

---

historical

Existing research records a proposed Curve acquisition subject to regulatory approval; completion is not established.

Proposed transaction; status needs refresh

Inspect quotation and source provenance →

---

source-supported disclosure

Reported nine-month statutory pretax profit: GBP6.6bn. This is not an investment allocation.

Nine months ended / balance sheet at 30 September 2026

Inspect quotation and source provenance →

source-supported disclosure

Group customer deposits at September-end: GBP502.8bn; retain the FY2025 balance as a separate historical observation.

Nine months ended / balance sheet at 30 September 2026

Inspect quotation and source provenance →

---

source-supported disclosure

The Q3 statement treats the Curve acquisition as completed; integration scope and external procurement remain unproven.

Nine months ended / balance sheet at 30 September 2026

Inspect quotation and source provenance →

---

source-supported disclosure

Quarterly commentary describes investment levelling as the current strategic cycle ends. Do not assume an unrestricted new supplier budget.

Nine months ended / balance sheet at 30 September 2026

Inspect quotation and source provenance →

---

source-supported disclosure

FY2025 deposit balance corroborated at GBP496.5bn; it is not the current-quarter balance.

31 December 2025

Inspect quotation and source provenance →

---

source-supported disclosure

FY2025 deployment exceeded 30,000 Copilot licences. Usage and realised net benefit are not established by this count.

FY2025

Inspect quotation and source provenance →

---

source-supported disclosure

The annual report names faster application retirement and cloud migration among 2026 priorities.

2026 management priorities

Inspect quotation and source provenance →

source-supported disclosure

Accelerate 2030 explicitly prioritises core-platform renewal.

Strategy for 2027–2030

Inspect quotation and source provenance →

source-supported disclosure

The strategy makes enterprise data enablement a stated AI priority.

Strategy for 2027–2030

Inspect quotation and source provenance →

management expectation

Management projects about GBP2bn gross savings for the strategy; aggregation/run-rate definition needs validation. This is not supplier spend.

Strategy for 2027–2030

Inspect quotation and source provenance →

management expectation

The 2030 efficiency ambition is a cost-to-income ratio below 45%; achievement is not assumed.

Strategy for 2027–2030

Inspect quotation and source provenance →

source-supported disclosure

New wallet/payment propositions are an explicit strategy priority, providing a specific question for post-acquisition integration research.

Strategy for 2027–2030

Inspect quotation and source provenance →

management expectation

The presentation plans a 2027 investment increase followed by stability, subject to opportunity and return discipline; no candidate allocation is disclosed.

2027–2030 investment planning

Inspect quotation and source provenance →

source-supported disclosure

The bank identifies Google Cloud as an Envoy platform collaborator. Contract value, exclusivity and renewal are not disclosed.

Announced platform capability; not current effectiveness evidence

Inspect quotation and source provenance →

---

source-supported disclosure

Lloyds describes built-in Envoy controls and monitoring. A missing-control or greenfield-platform pitch is weakened; effectiveness needs customer validation.

Announced platform capability; not current effectiveness evidence

Inspect quotation and source provenance →

---

source-supported disclosure

The announcement schedules branch-brand changes through 2027. Delivery progress and customer outcomes remain to be checked.

Announced July 2026; branch changes planned through 2027

Inspect quotation and source provenance →

---

source-supported disclosure

The announcement excludes related role reductions. It does not evidence an outsourcing mandate.

Announced July 2026; branch changes planned through 2027

Inspect quotation and source provenance →

---

source-supported disclosure

Management reports roughly GBP50m AI contribution for 2025; net incremental benefit has not been independently verified.

FY2025

Inspect quotation and source provenance →

---

management expectation

Management expects more than GBP100m AI value in 2026. A target is not an achieved benefit or external budget.

2026 expectation

Inspect quotation and source provenance →

---

source-supported disclosure

Supplier assurance qualification is invitation-only; it is not evidence of an available contract.

Published process observed 9 November 2026

Inspect quotation and source provenance →

---

source-supported disclosure

The published process links Lloyds-specific Ariba registration to Sourcing contact; no invitation for this seller has been established.
